

Conflict Minerals Policy Statement

It is the intent of 35 Technologies Group, Inc. to only procure materials that are “DRC Conflict-Free”.

Conflict Minerals are defined under the U.S. Conflict Minerals Rule as tantalum, tin, tungsten and gold, which are the extracts of the minerals cassiterite, columbite-tantalite and wolframite, respectively.

To be “DRC Conflict Free”, conflict minerals may not originate from the following countries:

The Democratic Republic of the Congo (DRC) and its nine adjoining countries as outlined in Section 1502 of the Dodd Frank Act, namely Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia.

35 Technologies Group, Inc. supports the objectives of the U.S. legislation on the supply of “Conflict Minerals”. We do not knowingly procure the specified metals that originate from the “Conflict Region”.

To ensure compliance with these requirements, we have asked our suppliers to take reasonable due diligence with their supply chains to assure that the specified metals are being mined and/or smelted from outside of the “Conflict Region” or if mined and/or smelted within the “Conflict Region”, the mine and/or smelter must be certified, by an independent third party, as “Conflict Free”.

If we discover that the use of “Non-Conflict Free” minerals have been used in any of the components that we procure, we will take appropriate actions to transition product to be “Conflict Free”.
